City, State, ZIP: \_\_\_\_\_

FAX Number: (\_\_\_\_) \_\_\_\_\_

Email Address: \_\_\_\_\_

Name of grape selection: \_\_\_\_\_

PROPRIETARY NONPROPRIETARY (circle one)

Will this material be protected by a United States patent? YES NO (circle one)

Type (circle one): Table Raisin Wine Rootstock (PLEASE ATTACH DESCRIPTION OR DESCRIBE BRIEFLY BELOW, INCLUDE SPECIES) \_\_\_\_\_

Source vineyard location: \_\_\_\_\_ Block: \_\_\_\_\_ Row: \_\_\_\_\_ Vine: \_\_\_\_\_

Sanitary status (disease testing history): \_\_\_\_\_

Date cuttings supplied: \_\_\_\_\_ Number of cuttings supplied: \_\_\_\_\_ Length of cuttings supplied: \_\_\_\_\_

Do you wish to include this selection in the California Grapevine Registration and Certification Program if it qualifies after completion of treatment/testing? YES NO (circle one)

Do you want information about this selection included in FPS publications that are available for public distribution?: YES NO (circle one)

#### **Please check type of service desired:**

**Option 1:** Complete disease testing panel and concurrent disease elimination treatment by micro shoot tip culture or heat therapy, including pre- and post-treatment testing panels to qualify foreign and domestic selections for release from federal quarantine and/or inclusion in the California certification program

.....\$5,000 per foreign or domestic nonproprietary selection; \$6,500 per foreign proprietary selection

**Option 2:** Disease elimination treatment (domestic selections only) by micro shoot tip culture or heat therapy followed by ELISA testing to produce ELISA-negative selection; materials produced are not qualified for the California certification program without further testing .....

\$3,000 per selection

**Option 3:** Disease test individual grapevines for virus by field indexing panel; this testing will not qualify a vine for inclusion in the California certification program .....

\$750 per vine

**Option 4:** Disease test individual grapevines for virus by ELISA and herbaceous indexing panels; this testing will not qualify a vine for inclusion in the California certification program.....

\$750 per vine

**Option 5:** Complete disease testing panel (ELISA, field & herbaceous) without disease elimination treatment to qualify foreign and/or domestic selections for release from federal quarantine and/or inclusion in the California grapevine certification program.....

\$1,500 per nonproprietary selection; \$3,000 per proprietary selection

**Option 6:** Complete disease testing panel and concurrent disease elimination treatment, including pre-treatment testing panel only (with optional post-treatment testing at an additional charge) to qualify foreign and/or domestic selections for release from federal quarantine and/or inclusion in the California grapevine certification program

.....\$2,000 per nonproprietary selection; \$3,500 per proprietary selection; an additional charge of \$3,000 per selection will apply if original materials test positive for disease and customer chooses to have treated materials tested

**Option 7:** Plant and Maintain Qualified Private Grape Selection in the FPS Foundation Vineyard..\$500 per selection

**Option 8:** Maintain Currently-Planted Qualified Private Grape Selection in the Foundation Vineyard

.....\$150 per year per selection
