<b>KEY</b>	
<b><u>Status</u></b>	= Refers to the accession's status in the California Registration & Certification (R&C) Program for Deciduous Fruit and Nut Trees
R	= Accession qualifies as Foundation-level (or "Registered") stock in the R&C Program
P	= Provisional stock—accession has passed R&C Program disease testing requirements, but has not yet been verified true to variety, so has not yet achieved full Foundation/Registered status in the R&C Program; may be planted "provisionally" in registered increase blocks at customer's risk with prior CDFA approval
N	= Nonregistered stock—either not eligible for registration in the R&C Program or there are no current plans to advance the accession to Foundation/Registered status
SD	= Accession is available as California certified Foundation seed
(Proprietary)	= Proprietary accession—must have prior written permission from owner or UC breeder to obtain propagating material
<b><i>Bold, italics</i></b>	= UC-patented cultivar—only official UC licensees may obtain propagating material; please read information below to inquire about licensing for UC cultivars

FPS can sell propagating material of UC-patented cultivars only to those who have current license agreements with UC Davis Technology Transfer Services (TTS). For licensing information, please contact:
